About Vessel-Net

Vessel-Net is a Hollywood, FL based provider of global **M**arine **A**dministration and **P**lanning Solutions to all commercial marine organizations. Vessel-Net's MAP solution is comprised of three branches, Marine, Business & Hospitality, covering twenty modules. MAP is designed as an open architecture system written in Java Server Pages (JSP) and Active Server Pages (ASP) that can support NT/UNIX platforms and any relational database, such as Oracle. This unique thin client design provides flexibility and allows access remotely from a ship or from the home office via the Internet, intranet or extranet. Vessel-Net provides marine organizations with complete solutions including consulting, software, and implementation services.
